

For the Farmer.

RECLAIMING OLD PASTURE.—Professor Johnson of Yale College gives the following instance, showing how an old pasture was renovated: "This pasture had once been twenty years ago—in tolerably good condition; but when the work of restoration commenced, ten years ago, the field was unproductive, and almost covered with low bushes and mossy growth. The bushes were cut, drains established, and lime applied at the rate of 250 bushels per acre in the autumn and winter. In the following spring the surface was scratched with a fine-toothed harrow, and red-top seed sown, and a light dressing of phosphatic guano (250 pounds to the acre) applied. The field contained from five to six acres, and before the dressing, offered scant pasturage for one cow. In the season of 1868 it offered abundant pasturage for five cows, the growth being mainly red-top and white clover. No further dressing has been applied. Weeds and scattered woody growth are annually cut off in August, and a good coating of grass is left for winter protection. No grazing is allowed after the 25th of October."

PLASTER AND ITS USES.—Plaster in the different branches of the arts is known by different names. In the arts it is plaster; in mineralogy it is gypsum; in chemistry it is sulphate of lime. Sulphuric acid has an affinity for ammonia, and when it finds ammonia it breaks up its partnership with the lime and combines with the ammonia, forming sulphate of ammonia, and this is non-volatile. The lime finds a companion when deserted by the acid in carbonic acid, forming carbonate of lime. Hence it will be seen that when the farmer his ammonia in the soil, put there by himself in manure, or in any other manner, liable to waste, the plaster will fix it there, and in all such cases it can be applied to the ground with profit. The odor about stables and manure heaps is escaping ammonia and the farmer can judiciously use a little plaster in both places, saving the ammonia for his land.

WHEN SHOULD PIGS BE WEANED?—Eight weeks old is the best age. Seven will do. They should become accustomed to food such as is ordinarily given to hogs before weaning, and then there will be no need of any loss in growth by the loss of the mother's milk. If they are at all inclined to scour, one of the best preventives is an occasional day's feed of whole corn, or a few kernels with their other food each day. They should have all they will eat, and even if the farmer is under the necessity of buying corn to keep them along till his own harvest is ready in the fall, the growth will generally pay at least fifty per cent. over the cost. Remember this.

Much diversity of opinion prevails on the subject of blind teeth in horses, but a majority of farmers are of the opinion that they are injurious, and will cause blindness. Some owners of horses have grave doubts about the propriety of using the punch and hammer, and contend that such teeth do not occasion any injury to the eyes, and that it is barbarous to punch them out. But as there are few instances known of its being hurtful to the horse, to have the wolf or blind tooth knocked out, the dental excrescence had better be removed, to make sure of no bad consequences to the eyes. —Journal of the Farm.

POINTS OF A GOOD COW.—She's long in her face, she's fine in her horn, she'll quickly get fat without cake or corn; she's clean in the jaws, and full in her chin; she's heavy in flank and wide in loin; she's broad in her rib, and long in her rump; a straight and flat back with never a hump; she's wide in her hips, and calm in her eyes; she's fine in her shoulder and thin in her thighs; she's light in her neck and small in her tail; she's wide in the breast, and good at the pail; she's fine in the bone, and silky of skin, she's a grazer's without, and a butcher's within.—Ez.

A head of Egyptian seven-headed wheat, grown in Essex, England, from seed found in wrappings of an Egyptian Mummy, 2,700 years old, is shown by John Park, of Gates, Monroe county. It was like the pictures we see of this curious grain produced in the days of Joseph and Pharaoh, and first brought from England by Mr. Park. He also showed a peck of splendid Essex wheat, of full, round, golden berry, which he proposes to sow for seed.

THE Prairie Farmer says a good way to head off the apple-tree borers is, to bring thick soft soap to the boiling point to render liquid, and while the soap is hot, with a paint or whitewash brush apply it to the trunks of the trees, from the ground up as high as attacks of borers are to be apprehended. One application made about the first of June, each year, will sufficiently protect the trees.

Pear trees growing in grass are seldom productive. The best way of treating them is, to dig away the grass and weeds from a wide space over the roots, and after having this, cover the ground with old barnyard manure. This should be left undisturbed until Spring and then worked into the soil with a digging fork. —Rural American.

A cotemporary suggests that if drivers would know, experimentally, how a horse feels when his reins are twitched and jerked and "yanked," they should take a good-sized board-nail into their mouth, and tying a cord to either end, give a lively boy the ends, and let him "yank" them awhile.

Some farmers pasture cows in their orchards, causing the destruction of young trees and low branches of large ones. Hogs or sheep are better suited for the orchard, as they cannot reach very high, even if inclined to damage the branches.

APPLEADE.—Cut two large apples in slices, and pour a quart of boiling water over them; strain well and sweeten. To be drunk when cold or iced.

All cooked dishes, to retain their flavor, must be let cool in pure air.

THE SINGER SEWING MACHINE AHEAD OF ALL OTHERS!

Eighty-one Thousand Seven Hundred and Eighty-nine Machines Made and Sold the Past Year. The number exceeds by thousands the sales of any other Machine, and the demand is still increasing. THREE THOUSAND PER WEEK ARE NOW BEING MADE AND SOLD. THE REASONS WHY: Because it embodies essential principles not found in any other Machine; because of its simplicity of construction, ease of operation, uniformity of precise action at any speed, and capacity for the greatest range and variety of work, fine or coarse. Parties wishing to purchase should not fail to examine this best of all Sewing Machines. I have the Agency for this Machine, and will keep a full supply on hand. J. S. LOAN OF THE Chesapeake & Ohio R. R. Co.

The advantages and attraction of this Loan, for investment purposes, are many and important: 1. It is based upon one of the Great Through Lines between the Seaboard and the West. 2. The security is already created, the greater part of the line being in successful running operation. 3. The Local Traffic, from the unrivalled Agricultural regions and Iron and Coal deposits adjacent, must be large and profitable. 4. The enterprise receives important concessions and privileges from the States of Virginia and West Virginia. 5. It is under the management of efficient and well known capitalists, whose names are guarantees for its early completion and successful operation. 6. The Bonds can be had either in COUPON OR REGISTERED form; they have thirty years to run, both principal and interest being payable in gold. 7. They are of denominations of \$1,000, \$500 and \$100, bearing interest at the rate of six per cent. in coin, payable May 1st and November 1st.

From our intimate acquaintance with the affairs and condition of the Company, we know these securities to be peculiarly desirable, and suitable for safe employment of surplus capital, and funding of Government Bonds, by Investors, Trustees of Estates, and others who prefer absolute security with reasonable income. Holders of United States Five Twenties are enabled to procure these Bonds, bearing the same rate of interest and having a longer period to run and to realize a large increase of capital in addition.

Bonds and Stocks dealt in at the Stock Exchange, received in exchange for this Loan, at the full market value, and the bonds returned free of express charges. Price 90 and accrued interest in Currency. Pamphlets, Maps, and full information furnished on application. FISK & HATCH, May 4-10w] 5 NASSAU STREET, NEW YORK.

O, YES! O, YES!! A GOOD FARM FOR SALE. Persons desirous of purchasing a farm, are directed to examine that valuable property in Lawrence township, and situate at the mouth of Clearfield creek—two miles west of the Borough of Clearfield, and convenient to schools and churches. The property contains ONE HUNDRED AND TWENTY ACRES, part of which is improved and under a high state of cultivation—the whole being well fenced. Coal, iron ore, and other minerals are found on the same. The buildings consist of a good TWO-STORY DWELLING HOUSE, 25 by 48 feet—a GOOD BARN, and other convenient buildings. And there is growing on the premises a young bearing orchard of choice fruit trees. This property is very pleasantly situated and being at the confluence of the creek and the river, it is a very desirable and inviting residence for a private family. Its position on the creek and river also render it a good situation for a boarding house during the rafting season. The west and north side of this property being bounded by the creek and river, makes it one of the best rafting grounds in this section, and as such yields a handsome revenue yearly. The owner, Mr. M. A. Frank, having permanently settled in the west, is the reason for disposing of this valuable property. For terms, etc., apply to S. J. ROW, Clearfield, Pa. October 6, 1869.
